# *Who we are*

- **One of the leading European research and development team in Digital System Testing and Dependability**

# *Our Mission*

***R&D-ing on Digital System Design, Testing, Dependability, and Accessibility to properly serve companies, R&D centers, and students.***

# ***Our consolidated know-how***

- **Core, Component, Board, & System Testing**
- **Microprocessor & Memory Testing**
- **Design-for Testability, Built-In Self Test, Built-in Self Repair**
- **System level modeling**
- **Design Validation & Verification**
- **Dependability Analysis & Evaluation**
- **Fault Injection Techniques**
- **Accessibility - Deaf People**

# *Our interests here...*

# *Future of Internet*

***ATLAS :***  
***Automatic***  
***Translation into***  
***Sign Languages***

# Goal

- Exploiting the convergence between cognitive sciences and ICT to build innovative services to provide *deaf* people with the access to broadcast communications, through the automatic translation of the written natural language into the animated Sign Languages.

# *Challenge 3*

***Flash Memories  
Design  
for Space  
Applications***

# *ExoMars Mission*

## **Aim:**

- **further characterize the biological environment on Mars**
- **preparation for robotic and human exploration**
- **gather data for Exobiology (*the search for life on other planets*)**

***Advanced  
Microprocessors  
On-line Testing***

# Goal

- **Developing a user-oriented on-line testing of advanced microprocessors (PowerPC, Pentium) for high dependable applications (High Speed Trains control)**

***Memory  
Self-Testing,  
Self-Diagnosing &  
Self-Repairing***

***System Level  
Design & Modeling  
via TLM***

- **Consortium of 30+ Italian Universities (Computer Engineering & Computer Science)**
